PROFESSIONAL SUMMARY

Full Stack Developer specializing in MERN stack and AI-driven systems, with experience building scalable products, real-time applications, and automation workflows. Strong focus on backend architecture, third-party integrations, and system design. Experienced in developing production-grade systems integrating communication platforms, payment gateways, and enterprise APIs.

TECHNICAL SKILLS

Languages	C, C++, Python, JavaScript, Java, PHP
Frontend	React.js, Next.js, TypeScript, HTML, CSS
Backend	Node.js, Express.js, REST APIs, WebSockets, Microservices
Databases	MongoDB, PostgreSQL, SQL
Cloud & DevOps	AWS (EC2, S3), Render, Docker, CI/CD
Integrations & APIs	Twilio API, Google OAuth, Salesforce API, WhatsApp Cloud API (Meta), Razorpay
Real-Time Systems	WebSockets, Redis, BullMQ, Event-driven architecture
AI & Automation	RAG, LangChain, LangGraph, FAISS, n8n, AI Agents
Tools	Git, Jira, Notion, Postman, Linux
Systems Programming	POSIX APIs, Linux Kernel, QNX RTOS

PROFESSIONAL EXPERIENCE

- Software Engineer, Amdrodd Technologies

2026 – Present

 - Worked on a CRM platform using MERN stack with integrated communication and workflow automation.
 - Integrated Twilio for messaging, Google OAuth for email workflows, and Fathom API for meeting insights and call tracking.
 - Developed backend services to automate Salesforce operations, enabling seamless data synchronization and workflow execution.
 - Built AI agents for lead enrichment, profile analysis, and risk prediction using historical data.
- MERN Stack Developer, Datahex Digital Solutions

2024 – 2026

 - Built a School Management System managing mentors, students, finances, and academic workflows.
 - Developed a gamified LMS platform with chat, multimedia support, notifications, and payment integrations.
 - Contributed to an AI-powered event platform with WhatsApp campaigns, vector search, and recommendation systems.
 - Built real-time transcription and translation systems using WebSockets and third-party APIs.
 - Developed visa processing and finance tracking applications using Node.js and React.
 - Built facial recognition-based photo retrieval systems and exhibitor dashboards.
- Software Engineer, Acsia Technologies

2023 – 2024

 - Optimized QNX RTOS for improved boot time, memory usage, and CPU performance.
 - Worked on Adaptive AUTOSAR, AOSP applications and system performance tuning.
 - Worked on Linux audio drivers, POSIX APIs, and kernel-level programming.

PERSONAL PROJECTS

- **WhatsApp, IG AI Agent:** Built a multi-tenant automation platform using Meta WhatsApp Cloud API (Flows, Business API), Instagram Graph api integrated with Notion, Google Sheets, Calendars, Gmail, and Gemini via LangChain and LangGraph, RAG. Used Redis and BullMQ for scalable task processing.
- **ERP System:** Developed a Multi Tenant ERP solution using Node.js, PostgreSQL, and React with GST compliance, inventory management, accounting, and CRM modules.
- **Custom CRM:** Designed a CRM system with lead tracking, communication logging, and automation workflows.
- **WhatsApp Broadcasting System:** Developed a real-time bulk messaging system using Baileys (WebSockets) for automation workflows.
- **Knowledge AI System:** Built a RAG-based system using Gemini on structured SQL data for context-aware question answering.
- **EcoCart (E-Commerce):** MERN-based platform with cart, payments (Razorpay), and admin dashboard.
- **BHP Detection System:** CNN-based image classification system integrated with Node.js and WhatsApp notifications.
- **Music App:** MERN-based streaming platform with playlists and search.
- **Career Website:** PHP + MySQL job portal with admin and user workflows.

ACHIEVEMENTS

- Conducted a hackathon focused on solving real-world problems.
- 1st Prize – Decipher Hackathon.
- 4th Rank – VAIGA Agri Hackathon (Government of Kerala).
